

# Certification

Dr. Farid Ahmad Oqabi visited the Department of General Pediatric/Pediatric Pneumology of the University Hospital Düsseldorf from March 9th to April 24th 2015.

He observed a large variety of diagnostic and therapeutic pediatric bronchoscopies, including removal of foreign bodies in flexible and rigid technique. In our pediatric bronchoscopy unit more than 200 bronchoscopies, laryngoscopies and endoscopic swallowing evaluations per year are performed.

Dr. Farid Ahmad Oqabi was able to join all these examinations, including our daily work at the pediatric units and the neonatal/pediatric intensive care units.

We were very happy to have had Dr. Oqabi with us and we wish him all the best for his future.
